

FARMCHAIN

Stellar-Powered Farmers Marketplace

Problem Statement

Small-scale farmers often lose a significant portion of their profits because agricultural products pass through multiple middlemen before reaching consumers. Farmers receive low prices while consumers pay high prices.

Proposed Solution

FarmChain is a decentralized marketplace built on the Stellar blockchain that connects farmers directly with buyers, retailers, restaurants, and wholesalers. Payments are processed securely and transparently without unnecessary intermediaries. It aims at Cutting out the middleman. Putting power back in the farm. Empowering Farmers. Maximising Yields.Transparent Trade .

How Stellar is Used

We chose the Stellar network over other blockchains because it is purpose built for real-world financial transactions and micro-payments:

- Fast and low-cost payments
- Secure transaction records
- Smart contracts using Soroban
- Transparent payment history
- Cross-border agricultural trade support

Key Features

- Farmer registration and verification
- Product listing marketplace
- Direct buyer-to-farmer payments
- Escrow smart contracts
- Delivery tracking
- Digital receipts and transaction history

System Workflow

1. Farmer lists produce.
2. Buyer places an order.
3. Payment is locked in a Stellar smart contract.
4. Farmer ships goods.
5. Buyer confirms delivery.
6. Funds are automatically released.

Benefits

- Higher income for farmers
- Lower prices for buyers
- Reduced fraud
- Increased transparency
- Financial inclusion

Target Users

Farmers, wholesalers, retailers, restaurants, exporters, and agricultural cooperatives.

Future Expansion

Crop insurance, microloans, AI price prediction, supply-chain tracking, and carbon-credit rewards.

CONCLUSION

FarmChain empowers farmers by removing middlemen from agricultural trade. Using Stellar's secure and low-cost blockchain infrastructure, farmers receive fair prices, buyers gain direct access to produce, and all transactions remain transparent and trustworthy.

FarmChain is not just a tech project; it is a financial lifeline for farmers. By utilizing the speed, low cost, and anchor infrastructure of the Stellar network, we are democratizing the agricultural supply chain. No middlemen. No delays. Just fair trade, powered by Stellar.
